Triphenylmethanol (also known as triphenylcarbinol, TrOH) is an organic compound. It is a white crystalline solid that is insoluble in water and petroleum ether, but well soluble in ethanol, diethyl ether, and benzene. In strongly acidic solutions, it produces an intensely yellow color, due to the formation of a stable "trityl" carbocation. Many derivatives of triphenylmethanol are important dyes.

Triphenylmethanol - Wikipedia

A permanganate is the general name for a chemical compound containing the manganate(VII) ion, (MnO_4^-). Because manganese is in the +7 oxidation state, the permanganate(VII) ion is a strong oxidizing agent. The ion has tetrahedral geometry. Permanganate solutions are purple in color and are stable in neutral or slightly alkaline media. The exact chemical reaction is dependent upon the organic ...

Permanganate - Wikipedia

Courses offered by the Department are listed under the subject code CHEM on the Stanford Bulletin's ExploreCourses web site.. For further information about the Department of Chemistry, see the department's web site. Chemistry is about the nature of matter, how to make it, how to measure it, how to model it.

The Chemistry and Applications of Metal-Organic Frameworks

Signaling Networks Determining Lifespan. Maintaining metabolic homeostasis within cells and tissues is important to the health of an organism. As one ages, endogenous and environmental stresses accumulate and result in a progressive failure to maintain the homeostatic balance.
