Geoprofessions is a term coined by the Geoprofessional Business Association to connote various technical disciplines that involve engineering, earth and environmental services applied to below-ground (subsurface), ground-surface, and ground-surface-connected conditions, structures, or formations. The principal disciplines include, as major categories:

Engineering geology is the application of the geology to engineering study for the purpose of assuring that the geological factors regarding the location, design, construction, operation and maintenance of engineering works are recognized and accounted for. Engineering geologists provide geological and geotechnical recommendations, analysis, and design associated with human development and ...

1. Introduction. Ground or rock anchors (sometimes referred to as anchorages) of a number of types have long been used for a range of purposes in rock engineering and in geotechnical engineering more generally (Hobst and Zajã-c, 1977, Hanna, 1982, Habib, 1989, Xanthakos, 1991, Littlejohn, 1993, Littlejohn, 1997). Rock anchors are capable of transmitting an applied tensile load to the rock mass ...

Civil Engineering FE Exam Preparation Workbook contains over 600 problems designed to reinforce your understanding of civil engineering concepts and equations found in the NCEES FE Reference Handbook. Like the actual exam, problems are grouped by topic and are multiple-choice. Solutions are provided for all problems so you can review problem-solving methods.

What you will study. On this course, you will gain a good mix of theoretical, practical, academic, management and industrial-based skills. Year 1 develops your skills in engineering science, mathematics, computing, engineering drawing (including AutoCAD), fluid mechanics, soil mechanics, structures, materials and sustainable construction and design.
