

The electronics principle on which radar operates is very similar to the principle of sound-wave reflection. If you shout in the direction of a sound-reflecting object (like a rocky canyon or cave), you will hear an echo.

### **NEETS MODULE 18-Radar Principles UNCLASSIFIED 1 RADAR**

Radar sets use the echo to determine the direction and distance of the reflecting object. The term RADAR is an acronym made up of the words: RAdio (Aim) Detecting And Ranging. The term "RADAR" was officially coined as an acronym by U.S. Navy Lieutenant Commander Samuel M. Tucker and F. R. Furth in November 1940.
