The lacrimal sac or lachrymal sac is the upper dilated end of the nasolacrimal duct, and is lodged in a deep groove formed by the lacrimal bone and frontal process of the maxilla. It connects the lacrimal canaliculi, which drain tears from the eye's surface, and the nasolacrimal duct, which conveys this fluid into the nasal cavity.

A nerve plexus is a plexus (branching network) of intersecting nerves. A nerve plexus is composed of afferent and efferent fibers that arise from the merging of the anterior rami of spinal nerves and blood vessels.

### **Nerve plexus - Wikipedia**

This note is designed to familiarize the student with the organs of the human body on both the micro- and macroscopic levels. At the completion of this note the student should understand the basic anatomical organization of the human body including the relative position of various organs, systems and tissues.

De arteriae vertebrales of wervelslagaders zijn twee belangrijke slagaders in de nek. Ze ontspringen uit de linker en rechter arteria subclavia. Vervolgens verlopen de arteriae vertebrales door de foramina transversia van de halswervels en komen via het foramen magnum de schedel binnen. In het hoofd komen zij samen in de arteria basilaris, een van de slagaders die de cirkel van Willis in de ...
