List of quantum chemistry and solid-state physics software

Condensed matter physics is the field of physics that deals with the macroscopic and microscopic physical properties of matter. In particular it is concerned with the "condensed" phases that appear whenever the number of constituents in a system is extremely large and the interactions between the constituents are strong.

The all-solid-state lithium batteries with solid electrolytes are considered to be the new generation of devices for energy storage. To accelerate the research and development, the overall picture about the current state of all solid-state lithium batteries was reviewed in this article with major focus on the material aspects.

The Park Group is affiliated with the Department of Chemistry and Chemical Biology and the Department of Physics at Harvard University. The group focuses on fundamental studies of nanoscale electrical, optical, and plasmonic devices that operate based upon quantum mechanical principles as well as the development of new nano- and microelectronic tools that can interface with living cells, cell ...
